

Colonoscopy Procedure Report -Follow-up

GI Associates of Boston | Dr. Elena Hartley, MD

Patient: Jane Doe | DOB: 1988-03-14 | MRN: 00142837

Procedure date: 2025-10-11 Endoscopist: Dr. Elena Hartley, MD

INDICATION

Annual surveillance colonoscopy. Patient with 7-year history of ulcerative colitis, previously in clinical remission on mesalamine 2.4g/day.

FINDINGS

Extent of disease: Left-sided colitis (E2)

Mayo Endoscopic Score: 1 (mild -decreased vascular pattern, mild friability)

Rectum: Mild erythema, slightly granular mucosa. Vascular pattern partially obscured. No ulceration or spontaneous bleeding.

Sigmoid/descending colon: Near-normal with mild residual erythema at sigmoid. Pseudopolyps from prior disease, no active ulceration.

Remainder of colon and terminal ileum: Normal. No dysplasia-suspicious lesions.

IMPRESSION & PLAN

Mild endoscopic activity (remission vs low-grade active disease).

Continue mesalamine 2.4g/day. No escalation needed at this time.

Next surveillance colonoscopy in 12 months.
