

Operative Report -Diagnostic Laparoscopy

GI Associates of Boston | Dr. Elena Hartley, MD

Patient: Jane Doe | DOB: 1988-03-14 | MRN: 00142837

Date of procedure: 2020-08-19 Surgeon: Dr. R. Hoffman, MD, FACS

Anesthesia: General Duration: 35 min EBL: Minimal

INDICATION

Acute pelvic pain, rule out appendicitis vs. IBD-related complication.

OPERATIVE FINDINGS

Abdomen entered via Hassan technique at umbilicus. Peritoneal cavity entered without complication. Systematic survey performed.

Appendix: Normal appearing, no periappendiceal inflammation.

Small bowel: Normal caliber and appearance throughout.

Colon: Sigmoid and rectum appear thickened with serosal injection, consistent with known UC.

No perforation, abscess, or fistula.

Pelvis: No free fluid. Uterus and adnexa normal.

CONCLUSION

Pelvic pain attributable to active UC, not surgical emergency.

No operative intervention required. Medical management continued.

Patient discharged home same day in stable condition.
