Collected: 2025-09-28 Lab: Quest Diagnostics Ref: STC-2025-381047

INFLAMMATORY MARKERS

TEST	RESULT	UNIT	REFERENCE	FLAG
Fecal Calprotectin	142	mcg/g	<50	HIGH *
Fecal Lactoferrin	3.1	ug/mL	<7.25	NORMAL
Fecal Occult Blood	Negative		Negative	NORMAL

INTERPRETATION

Mildly elevated calprotectin (142 mcg/g) with normal lactoferrin suggests low-grade mucosal inflammation, consistent with quiescent UC or early subclinical activity. Significant improvement from previous value of 890 mcg/g. Continue current regimen.
